

Stravilink WH3^{*}

Datasheet

Stravilink WH3 is a [resilient wall brace](#) used to isolate a wall from an adjacent support.

BENEFITS

- Standard wall tie designed to take a horizontal load of 0 to 200N with a design load of 100N
- Cost effective
- Quick and easy to install
- Minimum void depth between walls is 41 mm
- Steel elements are Zinc plated
- Other types available upon request
- To specify which Stravilink WH3 wall tie you require CDM Stravitec's engineers will need the following information:
 - Decoupled structure is supported or not
 - Horizontal and vertical loads

*Previously known as CDM-WH3

TYPICAL ASSEMBLIES

1. Wall
2. Stravilink WH3
3. Absorption layer
4. Stravilink WallStrip
5. Plasterboards
6. Structural reinforced concrete slab
