Stravilink Zbar
Datasheet

Stravilink Zbar is a frameless, low-profile resilient fixation system for acoustic ceilings that isolates the primary ceiling structure (Zbar profile) from the structure.

It is a streamlined resilient fixation system designed for ceilings with void depth from 4'' (100 mm). Stravilink Zbar solution is used to isolate acoustical ceilings from the structure without the need for spring hangers.

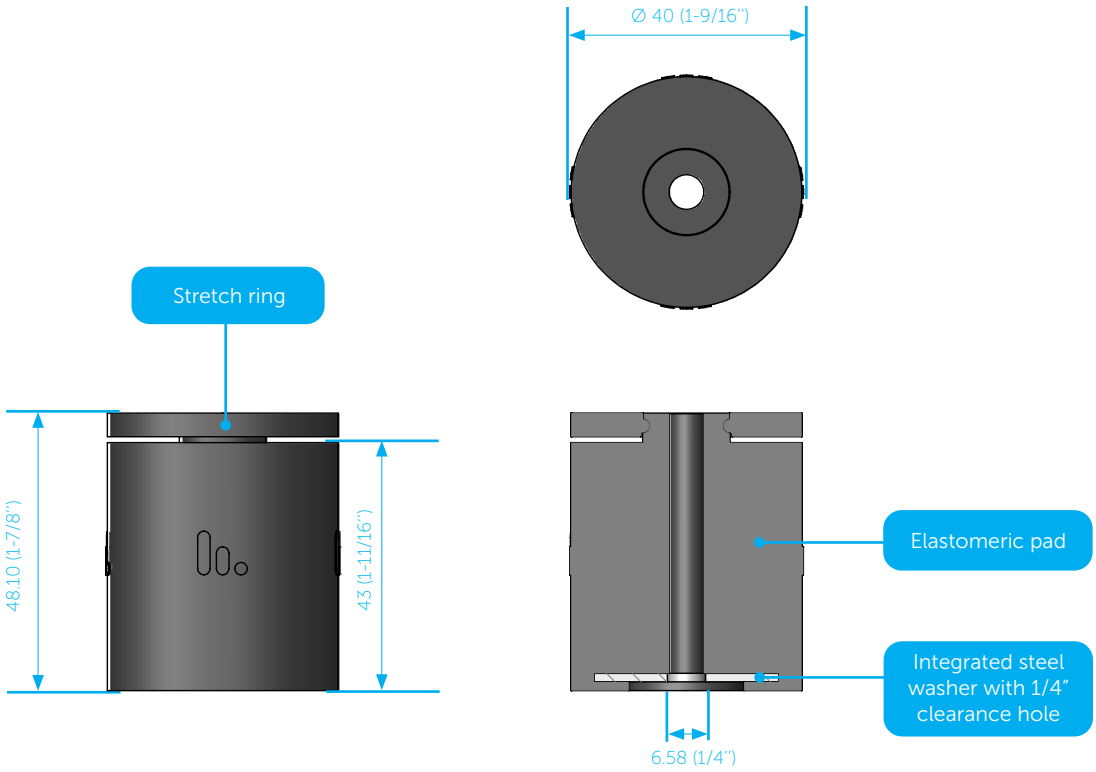
BENEFITS

- Cost effective
- Quick and easy to install
- Void depth from 4'' (100 mm)
- Main isolator completely fits within vertical leg of Zbar profile, no adhesive necessary
- Tested at accreditated lab (NRC), including in combination with floor setup
- Can be used in combination with floating floors, wall isolation and isolated ceilings to create box-in-box constructions
- Complete with sleeve isolator for fixation system

PHYSICAL & MECHANICAL PROPERTIES

Model	Design Load		Resonance Frequency at Design Load	Load Range (per Hanger)		Pad Colour
	lbs	N	Hz	lbs	N	
Stravilink Zbar	108	480	7	45-135	200-600	Black

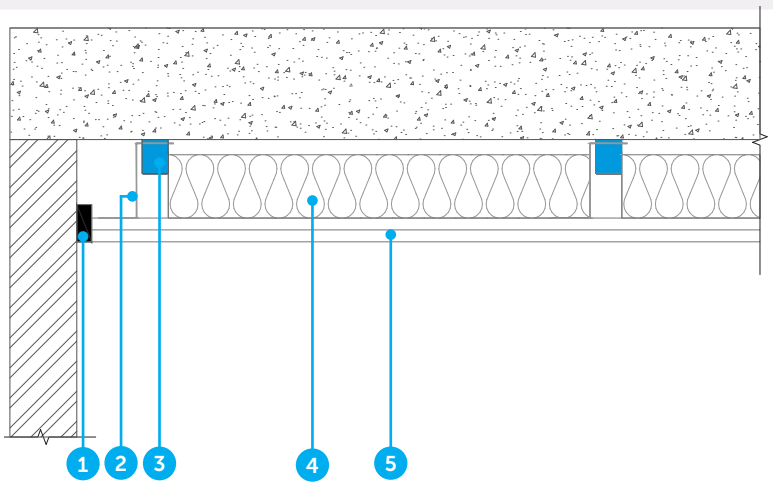
Notes:
Products are suited up to a C2 environment (atmosphere with little or no degree of pollution).
To assess which type is appropriate the following information is needed:
1) The weight and construction of the supported ceiling - this will determine the type of hanger;
2) The weights and support locations of any items hung from the ceiling.



Notes:
All dimensions in milimeters (inches).

TYPICAL ASSEMBLIES

1. Perimeter Strip
2. Zbar profile
3. Stravilink Zbar
4. Insulation
5. Drywall



ACOUSTICAL RESULTS

Test Setup

1. 150 mm (6") precast concrete slab
2. Stravilink Zbar frameless ceiling isolators
3. 100 mm (4") Z-channels, spaced at 610 mm (24") on centers
4. 89 mm (3-1/2") glass fibre insulation batts in the cavity
5. 2 layers of 16 mm (5/8") Type X gypsum board

Setup	IIC	STC

DISCLAIMER

The documentation prepared by CDM Stravitec (including but not limited to installation guidelines) contain generally accepted procedures for a successful installation of Stravilink Zbar for acoustically isolated ceiling hanger. Any part of the suggestions presented herein, or other documentation, may be followed, modified, or rejected by the owner, engineer, contractor, and/or their representative(s) since they, and not CDM Stravitec, are responsible for planning and execution procedures appropriate to a specific application. CDM Stravitec reserves the right to alter in part or in whole the documentation prepared as well any recommendations included. It is the responsibility of the Client (direct or indirect) to ensure they have always the latest documentation and to that effect CDM Stravitec encourage contact with its local representatives to review any project specific modifications to the suggested guidelines prior to the start of the installation on site.

This documentation prepared by CDM Stravitec contains loading information for the Stravilink Zbar for acoustically isolated ceiling hangers. It should be noted that any loading information contained herein represent the loading information for the Stravilink Zbar only as supplied to the Client. This information does not in any way represent an indication and/or validation of the load capacity of any other elements not supplied by CDM Stravitec - including but not limited to anchors, hanging wires, threaded rods and framing elements for the acoustical ceiling and/or supported elements.

This information is accurate to the best of our knowledge at the time of issue. Information, data and recommendations provided are based on industry accepted testing and prior product usage. It is intended as descriptive of the general capabilities and performance of our products and does not endorse applicability for any particular project. We reserve the right to change products, performance, and data without notice. This document replaces all information supplied prior to the publication hereof.
